

Plymoth “VBF- HEPA H14” Professional Airpurifiers.

Professional Airpurifiers for Coffee,- Lunch-, Meeting- and Waiting Rooms, Offices, Schools, Restaurants, Fitnessstudios, Changing rooms.....

VBF-700

VBF-1000

Plymoth VBF HEPA H14 professional Airpurifiers are used indoors for reducing Corona- and other Virus in the air. They come in two sizes. 700m³/h and 1000m³/h. It is recommended to filter the total air volume in a room 6 times/hour.

The VBF models are designed with 4-stage filtration:

1. Inlet Prefilter at the bottom for larger particles. Washable Aluminum mesh.
2. F5 prefilter. Makes the HEPA H14 filter last longer.
3. HEPA H14 filter. VBF-700/8m² and VBF-1000/13m². **With Certificate and Leak test.**
4. Outlet filter in the upper part of the VBF. Made of washable Aluminum mesh.

For your Safety each HEPA H14 filter is delivered with a **Certificate and is leak tested**. The efficiency is over 99.995% on particles and Virus which are under/over 0.16 micrometer (down to 0.01 micrometer). The Filters are manufactured in Europe by a HEPA H14 specialist, well known all over the world.

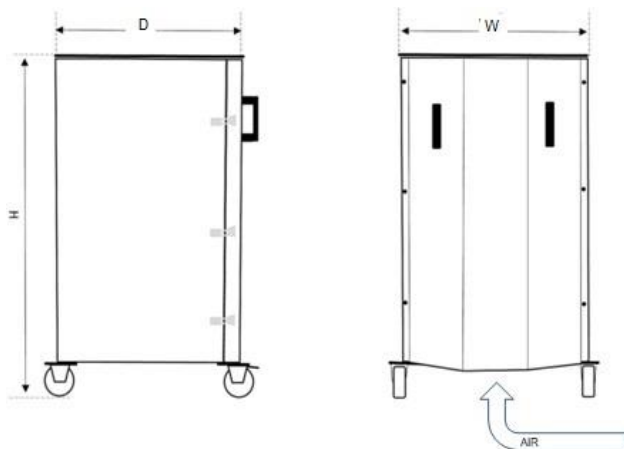

We recommend that the HEPA H14 filter should be changed 1 time/6 months to avoid the risk of growth of microorganisms.

All VBF Airpurifiers are designed with 1-phase, 220V EC motors. Just plug it in. You can decrease the air volume to levels where you hardly hear it.

The Plymouth VBF Professional Airpurifiers are designed in a very robust way and of highest quality materials. They are delivered with 4x125mm castors. 125mm high legs can be ordered separately.

The VBF-HEPA H14-UVC models are equipped with HEPA H14 filter and UVC Lamps. The door to all our VBF filters is locked with bolts. Only certified personal is allowed to open the filter unit

Noiselevel VBF (2m Distance-1,5m High)
